

# WTA Set Analysis

Peter Tea

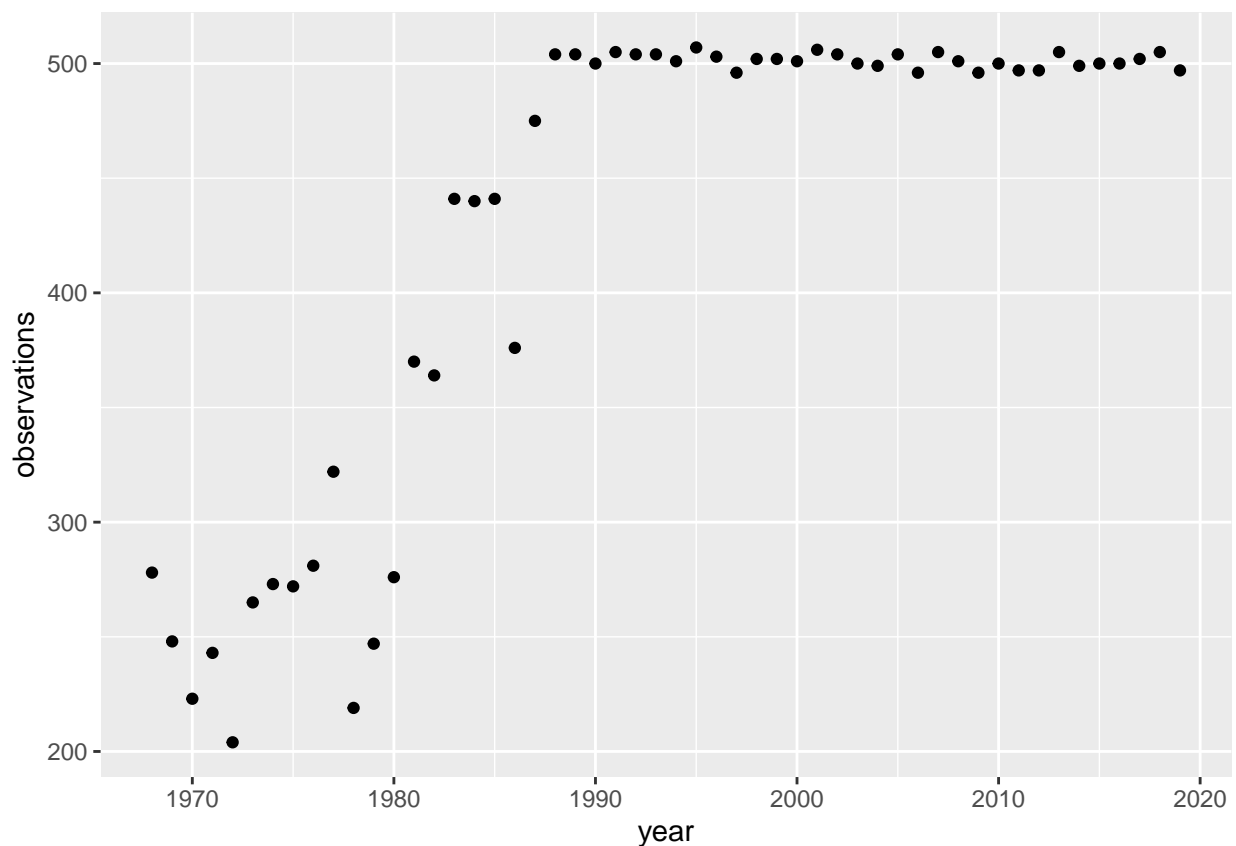

09/07/2020

## Data Source

Data obtained via Jeff Sackmann's tennis\_wta repo.

## Any gaps in the data?

Seems like before 1988, we have pretty small data samples.

## How likely are WTA players to win if they drop the opening set?

Interesting increase from 2001 - 2007, but most players don't end up winning after dropping the opening set. High proportion in QF and up group could be due to relatively smaller sample sizes.

Does dropping the 1st Set matter in the WTA
